Office Action Summary

Art Unit: 1765

15. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-46, and 50-54, drawn to a method for plasma etching a semiconductor substrate, classified in class 438, subclass 585 (+).
- II. Claims 47-49, drawn to semiconductor device, classified in class 257, subclass 1 (+).

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made in a materially different process such as a wet etching process or a dry etching process which employs different etch gasses or process conditions than those specifically claimed by the applicant.

Because these inventions are distinct for the reasons given above, and the inventions have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

A telephone call was made to attorney Bradley DeSandro on 10-22-99' to request an oral election to the above restriction requirement, but did not result in an election being made.

16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner George A. Goudreau whose telephone number is (703) -308-1915. The examiner can normally be reached on Monday through Friday from 9:30 to 6:00.
